

Irrigation District Notice

Water deliveries for the 2027 season will begin on April 15. Growers who plan to irrigate rice ground should submit their water orders at least five days before the first flood, so the district can schedule canal flows.

Because reservoir storage is below average, the board approved a temporary allocation of 3.2 acre-feet per acre. Additional water may become available after the May snowpack survey.

Fees

The standby charge remains \$18.50 per acre. Late orders will be filled as capacity allows.

Questions can be directed to the district office between 8 AM and 4 PM, Monday through Friday.
